

## Application for Weed Cost Share

### Program Overview:

The Weed Cost Share is a program to help landowners manage their invasive plant or agricultural weed problems through technical assistance and a cost share for incurred expenses. Funds will be awarded based on need, which is determined by the type of invasive species and whether or not you are an agricultural producer. Follow these simple steps to apply for the Weed Cost Share program:

1. Become a FSWCD cooperator, or confirm your status as a cooperator by contacting FSWCD.
2. Complete application and return to FSWCD. A pest scout will complete a site visit, and the information gathered will determine if you are eligible for the cost share, as well as technical assistance.
3. Follow the control recommendations provided by the pest scout - save your receipts!
4. At the end of the season send in your receipts, with a copy of this application and your control recommendation, and you may be reimbursed at a rate of 50%, up to \$250, for the recommended methods of control.

*\*Equipment purchases will NOT be reimbursed through this cost share!*

### Landowner Information

Name: \_\_\_\_\_ Phone: \_\_\_\_\_

E-mail: \_\_\_\_\_ Acres to be treated: \_\_\_\_\_
